Custom WordPress Theme

A custom WordPress theme developed as part my portfolio to showcase

Technologies Used

- WordPress
- PHP
- HTML5
- CSS3
- JavaScript
- Responsive Web Design

Project Highlights

- Custom WordPress theme structure and PHP templates
- Responsive layouts for desktop, tablet, and mobile
- Custom website navigation and page components
- CSS animations and interactive frontend elements
- Theme styling and layout customization

Development Approach

This project demonstrates my practical experience developing and customizing WordPress themes, translating design requirements into functional website components, and implementing responsive interfaces.
